

RAHUL DEWAL

React Developer (TypeScript)

Sector 71, Noida, UP | +91-8630407669 | rahuldewal1998@gmail.com | linkedin.com/in/rahuldewal33

PROFESSIONAL SUMMARY

React developer with 5+ years building production-grade web applications at product companies, including 2+ years working in TypeScript across multiple projects. Engineered a full LMS platform from scratch — role-based dashboards, Redux state management, and React-PDF integration — cutting load times by 30%. Builds reusable, type-safe component systems that reduce development time and scale cleanly across large feature sets.

TECHNICAL SKILLS

- Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI (MUI)
- Tools & Workflow: Git, GitHub, VS Code, NPM, Agile/Scrum, CI/CD basics
- Practices: REST API Integration, Component Architecture, Custom Hooks, Lazy Loading, Performance Optimization, Responsive Design, Type-Safe Development

PROFESSIONAL EXPERIENCE

React Developer (Frontend) — PM Publishers Pvt Ltd

July 2024 – Present

- Built the entire LMS frontend from zero — architecting all UI components, page layouts, and role-based flows for Super Admin, Admin, Teacher, and Student personas without relying on pre-built design systems.
- Implemented scalable architectures using React.js, TypeScript, Redux, and MUI, reducing reported UI defects across releases.
- Cut application load time by 30% by reducing bundle size, implementing lazy loading, and eliminating redundant renders — improving performance on low-bandwidth devices.
- Integrated React-PDF to enable in-browser document rendering, removing a key user friction point and reducing external tool dependency for end users.
- Improved UI/UX consistency across modules, reducing user-reported navigation issues by 25%.

React Developer (Frontend) — Ahom Technology Pvt Ltd

Feb 2022 – July 2024

- Built and maintained scalable, interactive web applications using React.js, TypeScript, JavaScript (ES6), HTML5, and CSS3.
- Developed reusable, typed components and custom hooks, reducing repetitive code by 40% and improving development efficiency.
- Integrated REST APIs using Redux, ensuring smooth data flow and reducing API-related bugs by 20%.
- Enhanced mobile responsiveness using Bootstrap, CSS Modules, Flexbox, and Grid, improving Lighthouse UI scoring by 15%.
- Collaborated with designers and backend teams, contributing to a 20% faster sprint delivery rate.
- Led version control workflows with Git/GitHub, improving code review efficiency.

Frontend Developer — Webtech Solution Pvt Ltd

March 2021 – Feb 2022

- Designed and developed responsive landing pages and dynamic web interfaces, increasing conversion performance for clients.
- Implemented mobile-first UI using HTML5, CSS3, JavaScript (ES6), Bootstrap, and custom CSS.
- Created reusable UI components that improved page load performance by 25%.
- Optimized images, scripts, and layouts to deliver smoother user experiences across browsers.

PROJECTS

Learning Management System (LMS)

Technologies: React.js, TypeScript, Redux, MUI, REST APIs

- Developed a fully responsive, role-based LMS supporting Super Admin, Admin, Teacher, and Student workflows.
- Built interactive dashboards and high-performance, type-safe UI components to improve student engagement.
- Implemented resource distribution modules with secure, role-based access control.

Viliyo — Client Training & Management Platform

Technologies: React.js, TypeScript, Redux, CRM Integration, Custom Hooks, REST API

- Built client management, training modules, assessments, and reporting dashboards.

- Implemented interactive learning features including case studies, role plays, group discussions, and assessments.
- Integrated CRM systems to manage subscriptions and track trainer data for improved coordination and reporting.
- Reduced data load delays by 20% by implementing optimized rendering methods.

Catzapp — Location-Based Job Discovery App

Technologies: React.js, TypeScript, REST APIs, Geo APIs

- Developed UI for geo-enabled job listings and community-based job recommendations.
- Built employer verification and chat/referral modules, improving job match relevance.
- Integrated smart recommendation logic based on skills, location, and user profile.

EDUCATION

Bachelor of Computer Applications (BCA) — Maharaja Agrasen Mahavidyalaya, 2018
